skipper

L'idea è nata dall'osservazione della conchiglia del nautilus: ogni singolo spicchio, di per sé una forma semplice, unito al successivo in una progressione curvilinea, crea una struttura estremamente robusta.

Questo vale non solo in natura: Skipper ha una struttura in compensato curvato, fatta di elementi di per sé semplicissimi, la cui unione trasforma il tutto in un volume eccezionalmente leggero e resistente.

All'esterno, la pelle riveste ogni spicchio sottolineando il disegno del nautilus. All'interno, una conca imbottita crea il nido ideale per accomodarsi in relax. Chi non ha mai sognato di rintanarsi comodo nel suo guscio?

The idea came from the observation of the nautilus shell: each single segment, a simple shape in itself, is joined to the next in a curvilinear progression, creating an extremely sturdy structure.

This is true not only in nature: Skipper has a curved plywood structure, made of elements that are very simple, but when assembled they transform everything into an exceptionally light and resistant volume.

Externally, each segment is covered by leather, emphasizing the nautilus design. Inside, a padded basin creates the ideal nest to sit in and relax. Who's never dreamed of comfortably cosying up in a shell?

Struttura in legno multistrato.
Imbottitura in poliuretano espanso.
Rivestimento esterno in pelle P3, P2, P1, cuscino rivestito in tessuto.
Base fissa in legno o girevole in metallo.

Structure in plywood.
Padding in polyurethane foams.
Upholstery in leather P3, P2, P1 (external part) and fabric (cushion).
Fixed base in wood or swivel base in metal.
